Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 09 January 2007.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 2-4 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 2-4 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 13 July 2005 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2, 4 are rejected under 35 U.S.C. 103(a) as being obvious over Tanaka (U.S. Pat. 6,142,602) in view of Reed et al (U.S. Pat. 6,585,348)

Tanaka discloses:

- ***regarding claim 4***, a removable cartridge having a printhead auxiliary member (cap/cover) for performing a number of different functions (protection, prevent drying of the ink) in respect of the printhead (Abstract; Column 1, Line 57 – Column 2, Line 12)

- transmission assembly arranged to selectively engage and drive the printhead auxiliary member (Figure 8; Column 6, Lines 31-44) from performing one of the number of maintenance functions to performing another of the number of maintenance functions (Column 4, Lines 16-25). When the cap is opened a brush cleans the ink injection port (maintenance function), and when the cap is closed it prevents the drying of the ink injection port (another maintenance function).

- ***regarding claim 2***, wherein the transmission assembly includes a drive shaft (24) and is arranged to engage and disengage with the printhead auxiliary

Art Unit: 2853

member upon rotation of the drive shaft in first and second directions respectively

(Figure 8; Column 6, Lines 31-44)

Tanaka does not disclose expressly:

- ***regarding claim 4***, printer cradle for supporting the cartridge within the printer such that the printhead is adjacent a media feed path; a printer cradle complementary to an inkjet cartridge of a type including a pagewidth printhead

Reed et al discloses:

- ***regarding claim 4***, printer cradle (129 of Figure 1) for supporting the cartridge within the printer such that the printhead is adjacent a media feed path (Figure 1) ; a printer cradle complementary to an inkjet cartridge of a type including a pagewidth printhead (Column 1, Line 59 – Column 2, Line 9), for the purpose of having a printhead to print across the entire width of a recording medium

At the time the invention was made it would have been obvious to a person of ordinary skill in the art to utilize an inkjet cartridge having a pagewidth printhead as taught by Reed et al into the device of Tanaka, for the purpose of having a printhead to print across the entire width of a recording medium.

Claim 3 rejected under 35 U.S.C. 103(a) as being unpatentable over Tanaka (U.S. Pat. 6,142,602) as modified by Reed et al (U.S. Pat. 6,585,348) as applied to claim 4 above, and further in view of Schalk et al (U.S. Pat. 6,749,298)

Tanaka as modified by Reed et al discloses all the claimed limitations above except for the following:

- **regarding claim 3**, a flipper gear assembly comprising: a first gear fixed to the drive shaft; a second gear radially displaced from the first gear; a locating member retaining the second gear and the first gear in a meshed configuration

Schalk et al discloses:

- **regarding claim 3**, a flipper gear assembly comprising: a first gear (104) fixed to the drive shaft; a second gear (106) radially displaced from the first gear (104); a locating member (1021, 1022) retaining the second gear (106) and the first gear (104) in a meshed configuration (Figure 4; Column 5, Lines 56 – 61), for the purpose of reducing size, complexity, and cost of ink jet printing systems.

At the time the invention was made it would have been obvious to a person of ordinary skill in the art to incorporate the teaching Schalk et al into the device of Tanaka as modified by Reed et al, for the purpose of reducing size, complexity, and cost of ink jet printing systems.

Response to Arguments

Applicant's arguments with respect to claims 2-4 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

Art Unit: 2853

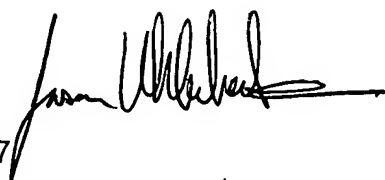

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jason Uhlenhake whose telephone number is (571) 272-5916. The examiner can normally be reached on Monday - Friday 8-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Stephen Meier can be reached on (571) 272-2149. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
